Preventative Maintenance Plan (PMP)

360° of Coverage

Regular maintenance services to prevent costly breakdowns and ensure long-term reliability.

Client responsibility:

- Provide access during scheduled service visit
- Notify Stirling of any operational issues
- Maintain appropriate environmental conditions surrounding equipment
- Scrape ice weekly to avoid excessive buildup
- Investigate any warnings on freezer display

Included with each visit:

- Cleaning of heat reject fins
- Alarms inspection & testing
- Door handle inspection
- Door seals & gaskets inspection
- Filter replacement (if needed)
- Scrape ice and remove from vacuum release port
- Document all serviced performed
- Recommendations for any repairs needed
- Verify temperature calibration
- Inspect battery life
- Inspect fan motors
